

# ARE YOU MEETING THE NEW GFSC CYBERSECURITY STANDARDS?

The Guernsey Financial Services Commission (GFSC) has introduced updated rules on cybersecurity. We can help you to comply with the new requirements and move you from your current position to a more mature cyber posture.

At C5 we combine our extensive reputation for cyber governance with our technology acumen to provide a holistic view on your cybersecurity posture and can ensure it aligns with your organisation's risk appetite.

## WHAT ARE THE NEW CYBERSECURITY RULES?

The new GFSC cybersecurity rules apply to all regulated financial entities.

These entities must be able to provide evidence to the GFSC, that the rules have been considered and implemented, all in accordance with the size, nature, and complexity of the organisation.

Even unregulated businesses should consider aligning with these rules as good cybersecurity is critical to maintaining your reputation and underpins your ability to grow.

## CYBER ASSESSMENT REPORT

We will deliver a "Findings and Recommendations" report, that will help articulate your cyber posture to your Board, the Regulator and guide your technical team.

Our pragmatic approach will give you the confidence that you are able to meet the rules or will help you understand the gaps you need to remediate.

All recommendations will be specific to your organisation.

 Training

# Key benefits at a glance...

We can help your organisation move towards, and ultimately become compliant, with both the governance and technological requirements to ensure robust cyber security.

## REPORTING

You will get a reliable, independent report, that is credible with your Board and the Regulator. This will highlight your current situation, our recommendations and provide a list of prioritised actions towards cyber compliance.

If significant gaps are identified, we can reconfirm the status of those specific areas post remediation.

## LOCAL SUPPORT

We have global expertise in cybersecurity governance which is made available to your organisation from day 1 via our local team.

Our local cybersecurity team has worked on many international cybersecurity assignments over the years.

This knowledge and experience is here to support you.

## ENGAGEMENT STYLE

The engagement style of the initial assessment is light touch via interview and discussion.

In addition to the report, our advisory leaders are able to present the findings to your Board.

Training is part of being compliant, we can provide solutions from standard eLearning modules to bespoke courses.

## CONTEXTUAL COMPLIANCE

We will consider your individual organisation, context, risks, informational assets and threat landscape to determine the best way for you to achieve the compliance requirements.

## COST CERTAINTY

We commit to fixed, realistic costs for the initial report.

We can also provide a costed solution for any potential remediation work that may be identified.

## END-TO-END SUPPORT

We offer the full suite of services from understanding your cyber position, helping to implement identified remediation actions, through to ongoing cyber management services to ensure you maintain and continually enhance your cyber posture.
